PROFILE

Frontend / React Native Engineer with commercial experience in developing mobile and web interfaces. Worked with React, React Native, TypeScript, Redux, React Navigation and modern JavaScript tools.

Experienced in creating adaptive screens, setting up navigation, integrating APIs, and building UI components based on design systems.

Able to maintain a clean project structure, work with theming and vector graphics, and improve interface usability. Focused on clear architecture, stability, and consistent professional growth.

Open to both office-based and remote work formats

Frontend Engineer

April 2024 - Present

Commercial IT Company (NDA)
Tallinn Remote / Hybrid

Frontend Developer

April 2023 – March 2024

Your Price Booking
Kyiv, Ukraine · Remote

RESPONSIBILITIES

- Developing web and mobile user-facing interfaces using modern frontend and React Native tools.
- Implementing screen layouts, navigation patterns, and reusable UI components.
- Working with REST APIs, managing data flows, and applying TypeScript for code reliability and maintainability.
- Building adaptive, responsive, and cross-browser layouts using theme-driven and component-based styling.
- Creating interactive UI elements, vector graphics, and improving user flows across application modules.
- Enhancing performance, stability, and overall user experience through targeted optimizations.
- Contributing to internal UI component development and improvements in interface architecture.
- Participating in engineering discussions, code reviews, and collaborative development processes.

PROJECTS

MY PORTFOLIO

- This is my portfolio site, by visiting which you can learn more about me, my skills, get acquainted with my projects, and you can also easily contact me.
- Languages and libraries used: Vite, TypeScript, React, React Bootstrap, SASS.
- Preview: https://olena-shalyhina.github.io/my_portfolio/
- GitHub: https://github.com/olena-shalyhina/my_portfolio/

RESTAURANT REACT

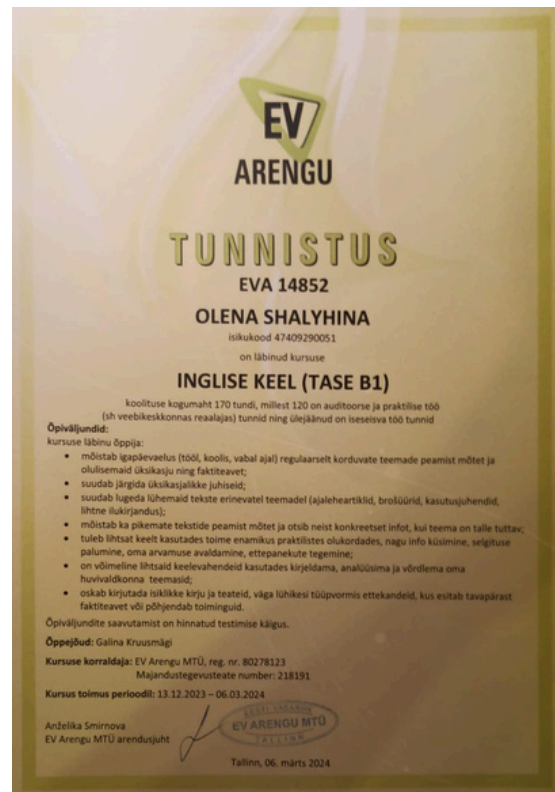

- This is a colorful, responsive single-page application with beautiful images and animations. The functionality of the application allows: navigate the site pages, book a place and time of visit, make an order online, manage shopping cart.
- Languages and libraries used: Vite, TypeScript, React, Redux Toolkit, React Router, React Hook Form, React Bootstrap, SASS.
- Preview: https://olena-shalyhina.github.io/online_restaurant_react/
- GitHub: https://github.com/olena-shalyhina/online_restaurant_react
